SUMMARY

Technical Sales Professional with 4.5 years of enterprise SaaS experience (135–185% quota attainment) and an MS in Computer Science (4.0 GPA). Proven ability to own technical discovery, demo/POC delivery, and RFP responses across complex, multi-stakeholder deals. Fluent in the modern SaaS sales stack and enterprise sales motion - minimal onboarding required to contribute in a customer-facing SE capacity.

PROFESSIONAL EXPERIENCE

Account Executive | Panopto | London, UK | January 2023 – June 2024

- Owned end-to-end technical pre-sales across 50+ enterprise accounts (\$100k+ ARR) for Gen-AI video SaaS solution, including discovery, custom demo environments, POC scoping, and RFP responses - frequently without a dedicated SE
- Built demo environments showcasing MS Teams and Canvas integrations, demonstrating 20% reduction in cross-organizational retrieval time; contributed to major contract wins at Imperial College London and Adyen

Sales Development Representative → Team Lead | Panopto | London, UK | June 2021 – January 2023

- Promoted to Team Lead following top global SDR performance (\$3M+ pipeline); partnered with SE and Product to sharpen technical qualification criteria, driving 30% increase in lead generation

Business Development Executive | Darktrace | Cambridge, UK | March 2020 – June 2021

- Conducted technical discovery for AI-powered cybersecurity SaaS, qualifying complex security infrastructure requirements with CISO and IT stakeholders
-

EDUCATION

Master of Science, Computer Science | Northeastern University | Boston, MA | Sept 2024 – Present | GPA: 4.0

BA, Philosophy and International Relations | University of Exeter | Exeter, UK

TECHNICAL PROJECTS

Otto PM (*Python, FastAPI, GCP, Vertex AI, Terraform*)

- AI-powered project management tool with RAG-based, GitHub-connected codebase Q&A; built end-to-end on GCP with vector search and cloud-native deployment.
- Our team won 2nd Place (out of 30) at an ML Expo at Google's Cambridge office for our project

Distributed Kanban Board (*C++, Node.js, React*)

- Real-time collaborative platform with custom primary-backup replication protocol, automatic failover, and sub-200ms update propagation.
-
